***Allowable Subject Matter***

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance for Claims 1-28: The best prior art of record, *IEEE/EIA 12207.0-1996, Software Life Cycle Processes* neither discloses nor fairly suggests the limitations of, in a method or computer assisted diagnostic system for straight through processing, the identification of one or more assessment issues relating to automatic processing of securities management functions using straight through processing, the capture of process and technology performance information relating to a current state of the system for implementing automated processing of securities transactions, the analysis of the process and technology information with respect to the one or more assessment issues based on a future state of the system for implementing automated processing of securities transactions and the formulation of at least one recommendation for improving process and technology performance for the application of straight through processing to securities transactions.

The *Lammersdorf* reference is cited for its disclosure of aspects of straight through processing of securities transactions. Other similar references identified could not be considered for application in a rejection because of their later filing dates.

The drawings are acceptable as presented.

***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for
